RAILWAY RATES COMPARED. TESTIMONY OF ME. BLANCHARD, OF ERIE, BEFORE

THE ASSEMBLY COMMITTEE. Vice-President Blanchard, of the New-York, Lake Erie and Western Railway, continued his testimony yesterday before the Assembly Kailroad Investigating Committee. In the morning he read a large number of statistics which he had had prepared. The fellowing table, he said, shows the earnings and expenses per ton for each mile of the Eric Railroad,

	Estatogs	Expense	Profits.
1879.	1 09	98 cis.	54 eta
1873.		94	51
1874.		91	40
1874.		95	25
1876.		88	21
1876.		75	20
1877.		67	30

According to this statement the percentage of rewelle the expenses were reduced 31.6, or 4.4 in favor of the public. A table of the receipts, expenses and profits per ton for each mile of all the railroads in New-York State is as follows:

	Receipts.	Expenses	Profits.
1870 1871 1871 1872 1873 1874 1878 1878 1879 1877	1 60 1 45 1 30 1 16 1 06	81 15 1 14 1 ₂ 1 15 1 08 96 85 77 69	55 ets. 55 51 51 47 84 30 28 31

duction was in receipts 47.14; expenses, 39.93; profits, 44.2. The percentage of reduction in the rate charged exceeded the percentage of reduction in expenses by 7.21 per cent, or in other words business men were baving their goods carried new at 58.73 per cent of the rate paid in 1870; while it costs the railroads 60.10 per cent as much to do it clow as thee. In this view he thought the patrons had saved 1.37 per cent more than the railways have, Mr. Blanchard also explained fully the classification of freignts, and said that rates were made necording to the value of the goods. He thought that a higher price should be charged for carrying silk than common cotton goods.

Mr. Sterne -Do you think then that the Western Union Telegraph Company can make the same discrimination? If I sent a message to my broker ordering him to buy me 10,000 shares of a certain stock, by which I made a profit of a half million dollars, should a different price be charged than it I had sent a telegram stating that my cow had calved?

Mr. Blanchard—If you see any similarity in the duction was in receipts 47.14; expenses, 39.93;

HOSPITALITY OF THE TABERNACLE.

"Now, then," continued Mr. Crosby, "for this accidental impority to pass such a vote is designedly for the purpose of breaking up the Presbytery of Brooklyn, and in behalf of righteonsness I protest." After several motions for the yeas and mays had been put, it was dee ded by a vote of 21 to 5 to hold the first usceing, in January, in Mr. Talmage's Tabernacle. A resolution was passed allowing Dr. Van Dyke and Mr. Crosby to sign their evidence again, after nearing it read by the Rev. Mr. Poote, when it will be submitted to the Long Island Synod.

The fishing smacks in some of the harbors on the north side of the island dragged their anchors, and in some instances were carried high and dry on the shore. There was also a high tide at Rockaway Beach, and the roar of the surfaceful be heard for miles. On Sunday afternoon snowtlakes were seen at the east end of the island.

A MISSIONARY'S EXPERIENCE. WORK AMONG THE INDIANS IN THE NORTHWEST-BISHOP DE GEANDIN'S WORK OF A QUARTER OF

A CENTURY. Twenty-five years ago the Count de Grandin, then a young man and belonging to an excellent family in France, received the orders of priestbood, left his home for the New World, and, following the leadership of a companion, entered upon the duties of a missionary among the Indian tribes of British America. He settled at a point in the British Possessions about 520 north latitude and 1340 west longitude. The place was called St. Albert, and there a mission was established. The young priest duction in earnings per ton on each mile was 36,2, was accompanied by a few associates, and the maons savage irrbes with which the country abounded. The object of the mission was to exert a civilizing influence among the Indians, to teach them peaceful pursuits and to lead them to the Roman Catholic faith. The work advanced slowly, but within five years the fruits of their labors were sufficient to warrant the establishment of a bishepric at St. Albert, and the Count de Grandin was selected for the office, which he continues to hold. The mission has since been extended to an archdiocese, presuled over by an archdishop and five bishops. Albert has grown from a mere settlement to be a town of 1,000 inhabitants, composed of Indians

and half-breeds.

Early in the present year Bishop de Grandin, accomposited by his Vear-General, Father 1 educ, wisited France, whence they arrived in New-York recently, on their homeward journey, accompanied by six young French priests who have entired the missionary service. The party left this city next day by the Pennsylvania Radicad for the Northwest; but previous to their departure a brieffalk with Father Leduc revealed some interesting points respecting the character of their work and some incidents of their node of life.

"We have many hardships," said Father Leduc," "but we are advancing steadily with our work.
